

IDMONEY FREQUENTLY ASKED QUESTIONS

IMPORTANT NOTICE: THE QUESTIONS AND ANSWERS WHICH APPEAR HERE MAY CONTAIN STATEMENTS OF WHAT IS EXPECTED AT THIS TIME AND IN THE FUTURE. HOWEVER, THESE STATEMENTS ARE SUBJECT TO RISKS AND VARIATIONS THAT COULD CAUSE ACTUAL RESULTS TO VARY FROM WHAT IS WRITTEN HERE. THE ANSWERS PROVIDED DO NOT CONSTITUTE INVESTMENT ADVICE, LEGAL ADVICE OR ASSERTIONS, BUT WILL PROVIDE INFORMATION ABOUT THE **IDMONEY** PROJECT AND THE SALE OF ITS TOKENS, (SCHEDULED TO BEGIN MARCH 16TH, 2018) ASSISTING IN YOUR DECISION PURCHASE.

IDMONEY FREQUENTLY ASKED QUESTIONS

1. *WHAT IS IDMONEY?*

IDMoney is the name of the project which we will further describe, the name of the Crypto Token (IDM) launched to fund and drive this project and the name of the company (**IDMoney S.A.**) which develops the project's software.

2. *WHAT IS THE IDMONEY PROJECT?*

The **IDMoney** Project has developed software built on blockchain technology which promotes the fields of human development, crypto governance, and socioeconomic impact. The **IDMoney** software, Money Making Wallet, empowers its users to exercise their fundamental right of a virtual personality by managing their personal information, deciding who has access to that information and under what terms that information can be used. By utilizing the Money Making Wallet, users can manage personal information and generate profit from their identity. They will be able to exchange personal data with government agencies, financial institutions, marketing firms and other interested parties.

Further, the **IDMoney** Project seeks to select three well-organized and advanced local governments of the world which agree to participate in the project, and to which the ownership of the software development company, **IDMoney S.A.**, will be transferred at the end of the project. With this, the **IDMoney** project will act as a case study on how the best local governments can regulate, integrate and achieve symbiosis with the crypto community.

The **IDM** Project also aims to bring about a socioeconomic impact using two additional project features. The first is the **IDMoney** Poverty Relief Program which will donate 20% of created **IDM** tokens (7 million **IDM**) to selected local governments to be directly distributed, free of charge, among poor persons of their municipality. The second is a software tool (Poverty Relief Tool) which will be developed to coordinate the poverty relief programs of selected local governments, and / or any other organization seeking to take advantage of this tool.

3. HOW IS OWNERSHIP TRANSFERRED TO LOCAL GOVERNMENTS?

While the company **IDMoney S.A.** is currently privately directed, all shares held in escrow will pass from a trust directly to three chosen local governments. Following the start of the ICO, a process of selection will begin (no more than three years) in electing three local governments suitable and dedicated to the furtherance of the vision. The delivery of **IDMoney S.A.** shares to local governments is a donation. The three chosen local districts would not have to pay for the shares but must agree to participate in the project and meet the established criteria to receive the donation.

4. WHAT ARE THE COMPONENTS, SERVICES, AND FEATURES OF THE MAKING WALLET SOFTWARE?

The software developed by **IDMoney S.A.** is free software, and all who choose to implement its use would form a “Human Development Network” that would have the following components, services, and features:

SELF-SOVEREIGN-IDENTITY:

Users of this free software create for themselves a virtual personality and Self-Sovereign-

Identity which gives them existence and functionality in the virtual world. The Money Making Wallet Application which can be downloaded to mobile handsets allows that all information (data, images, etc.) belongs to the user; the user governs their information, (their self-sovereign-identities). **IDMoney S.A.**, nor the companies, governments or institutions which may implement the software, nor any external entity may sell, use, reproduce, or share user information without user authorization.

The principle of Self-Sovereign-Identity proposes that it is a fundamental human right to have, or not to have, an identity which does not depend on any government or entity to exist. It is, therefore, a virtual personality. The creators of the **IDMoney** Project (the Governance Labs) have been proponents of the Fundamental Right to a Self-Sovereign Identity (virtual personality) since 2004. On May 9, 2005, it was proposed as a constitutional amendment to the Costa Rican Legislative Assembly (the Costa Rican Congress). Later Germany was the first country to institute Self-Sovereign-Identity as a fundamental human right.

MONEY MAKING WALLET:

It is within the Money Making Wallet (MMW) software that users can exercise and manage their self-sovereign identities. While the MMW functions as a traditional multi-currency crypto wallet, it also allows users to store data and personal information in an encrypted and secure way. Users can register all manner of personal information such as:

Name, sex, birthday, identification number, address, email addresses, telephone numbers, etc. Names of parents and children, family composition, education, abilities, interests, job title, needs (financial aid, home, work, study, courses, training, etc.) Properties, financial assets (bank accounts, debit or credit cards, etc.) Health information, blood type, medical treatments, allergies, organ donor.

Users can also store copies of relevant documents such as their identification, passport, driver's license, etc. within the wallet. The user determines what and with whom information is shared within the application.

CREDIT IDENTITY THEFT PROTECTION:

A wide range of personal information may be entered, updated and traded across the software but the MMW software also allows users to attach instructions and preferences

to information for 3rd party entities to access. For instance, within the Credit Preferences section of the application, a user may declare “Not seeking additional credit” and share universally. A bank, lender or store chain that is part of the MMW Human Development Network could check that users preferences (for a fee that is paid in part to the user) and show themselves to be forward thinking and committed to client satisfaction and security. Entities that are connected with the Human Development Network will be more reliable to their clients and preferred for embracing the empowerment and freedoms promoted by the software. Local governments which are chosen to implement this software would do well to develop relationships and promote its integration within their communities, connecting people, businesses, and governments to each other through the secure blockchain!

TITLE FRAUD PREVENTION:

Using this feature of the wallet, users can express their preferences or instructions about each of their properties. Such as, whether they are available for sale, rent or mortgage. Banks, car companies, lawyers or real estate agencies may review the information contained in the Human Development Network to confirm owners, characteristics, and availability of the property and in doing so prevent frauds.

A version of this service has had more than ten years of successful operation in Costa Rica. For ten years Scotiabank has required the purchase of that service from each client who mortgages property with them. This service would be migrated to the MMW blockchain for operation in the **IDMoney** network. For more information, please see <http://www.propiedadsegura.cr/> and engage Google Web Translator.

FINANCIAL TRANSACTIONS FILTER:

Through the Money Making Wallet App users can define limits which will serve to filter the transactions that financial entities may process over their financial assets (savings accounts, credit/debit cards). For instance, limits may be set based on based on but not limited to the following:

Amount (e.g., Do not process purchases greater than x amount)

Time (e.g., Only process purchases made from Monday to Friday between 8 am and 5 pm)

Country of Origin (e.g. Traveling to London May 6-16th 2019 Allow credit and debit transactions)

Transaction type (e.g., Only process university and bookstores purchases on this card) As third-party entities access this information, they may process or reject transactions according to client declarations. And again, as user preferences are requested the small fee associated is shared 50% to the user and 50% to **IDMoney**.

POVERTY RELIEF TOOL:

IDMoney is a human and social project, so that along with the Money Making Wallet, **IDMoney** will also develop a software component called “Poverty Relief Tool.” Specialized for coordinating the poverty relief programs it will be utilized by the local government institutions and other organizations that work in this arena. Among themselves, they will be able to store, manage and share pertinent information in a secure way. Everything from the people and families eligible to receive social, educational and economic assistance to the aid granted. Within the tool they can track transactions, which person has received assistance, amount and form given and by which agency to avoid duplication of work. The software will also make it possible to distribute aid more equitably among those who need it, by preventing the same individuals or families from receiving redundant help from different institutions or organizations while others receive nothing.

POVERTY RELIEF PROGRAM:

An important part of this project is that **IDMoney S.A.** has allocated 20% of the **IDM** tokens (7 million) for the Poverty Relief Program; this program consists of distributing those tokens -when the software has been developed and participating local governments have been chosen-, among the poor that would be selected and prepared by the local governments that would participate in the project. This will be done in coordination with local governments -and probably under supervision of local groups-, to maximize the impact of the program, which seeks to reduce poverty.

5. IS THE POVERTY RELIEF TOOL AND MONEY MAKING WALLET LINKED?

While the Poverty Relief Tool is independent of the Money Making Wallet, both components can communicate. This tool will be able to read the data that users want to share: Personal information, socioeconomic status of user/family and particularly needs expressed by the

user, so that they are taken into account.

6. HOW IS THIS PROJECT BEING DEVELOPED?

IDMoney is the first project being developed by a group of companies called the Crypto Liberty Consortium. The companies which compile that group are as follows:

GOVERNANCE LABS

Governance Labs is the parent company of the group to which the founders belong. It is out of the Governance Labs that the other companies were created to develop crypto projects with specialization in governance and human development. At this time, Governance Labs is wholly dedicated to creating, organizing and optimizing the Crypto Liberty Consortium to develop the **IDMoney** Project. However, after **IDMoney** has been successfully developed, Governance Labs will endeavor to execute a second project called “GlobalMoney,” which expands the **IDMoney** prototype and takes it worldwide.

LEGAL LABS

Legal Labs will research legal developments, to maximize positive societal impact, like the virtual personality fundamental right and the Free Software Act. LegalLabs also provides legal services and consulting to all companies of the Crypto Liberty Consortium. LegalLabs will offer its services to other projects in the future.

As the legal manager, Legal Labs will ensure a lawful and legitimate operation, following AML (Anti-Money Laundering) and KYC (Know Your Client) protocols. Each registered buyer with **IDMoney** will be evaluated according to global standards, ensuring funds are generated legally and that buyers are not from countries where the sale of **IDMoney** tokens is not permitted.

CRYPTOLAND.TV

CryptoLand.TV will serve as an information, education and entertainment center for everything related to the crypto community. Cryptoland.TV operates as the media leg of the Crypto Liberty Consortium and is a multi-platform site that will use interviews, news articles, video series, movies, shorts, testimonials and more to engage audiences. The first series produced by the Cryptoland.TV team will use an original manga animation which will

follow cryptocurrency characters as they rise and fall in an ever-evolving virtual world.

IDMONEY S.A.

IDMoney S.A. is the company that is developing the project software. **IDMoney S.A.** shares will be held in escrow. Later, all shares will be transferred and shared between the three local governments which accept project participation. This will occur after the project's software is fully developed, approximately three years after the start of the ICO.

A fifth company is also being created to provide management and financial advice within the group companies; this includes advising the employees and founders of the project in the management of their investments in crypto tokens.

7. WHERE WAS IDMONEY ESTABLISHED?

All these companies are established in Costa Rica and are subject to its laws. Each of the Crypto Liberty Consortium companies is privately owned. Only **IDMoney S.A.** which will have total ownership transferred to three chosen global local governments or municipalities.

8. WILL THE IDMONEY SOFTWARE BE RELEASED ON PRIVATE, OPEN OR FREE SOFTWARE LICENSE?

IDMoney's software will be released under Free Software License. Anyone will have the right to copy, improve, publish, distribute, implement and use it in any way; not just **IDMoney S.A.** or the local governments. In fact, the Crypto Liberty Consortium plans to use and modify software developed in the **IDMoney** Project for future implementation on a global level.

9. WHAT ROLE WILL IDMONEY PLAY IN SOFTWARE IMPLEMENTATION?

The **IDMoney** Project will develop a governance model as well as software but will not be responsible for its implementation. After the software is designed and **IDMoney** shares are transferred to the final owners; three dedicated local governments and they will be tasked with the integration and implementation of the software. As the shareholders of **IDMoney**

S.A., the decisions and responsibility will lie with these three local governments. They could choose to implement the software together under **IDMoney** as a company, implement separately or not at all. Ultimately, however, in selecting participating local governments it will be those that embrace the project and can appreciate the obvious benefits it has to offer who will be given the donation.

10. WHAT ARE IDMONEY TOKENS (IDM)?

IDM tokens are ERC-20 compatible tokens distributed on the Ethereum blockchain under a related ERC-20 smart contract.

11. WHAT ARE THE PURPOSES, FEATURES, AND USES OF THE IDMONEY (IDM) TOKENS?

The main purposes of the **IDMoney** tokens are:

- a. The generating of funds to further build and develop the **IDMoney** Project.
- b. The donation of 20% (7 million) of **IDM** tokens to finance the **IDMoney** Poverty Relief Program; A program which will consist of distributing **IDM** tokens among persons selected by participating local governments to directly impact livelihood and economic situations.
- c. Of the 35 million **IDM** total tokens, 18% (6.3 million) of **IDM** tokens will be used as a reward for the founders and collaborators of the project.

The **IDMoney** project is not responsible for software implementation, therefore token holders should not wait for the tokens to give right of use of any platform and / or the services. Further, possessing **IDM** tokens does not imply ownership of **IDMoney** S.A shares. Nor does possessing **IDM** tokens give voting rights in project decision making. (Exception: Token holders may vote in the selection of the final three municipalities that will participate in the project).

The **IDM** tokens do not carry expressed or implied rights, uses, purposes, attributes, functionalities or features. This includes, but is not limited to, uses, purposes, attributes, functionalities or features on implemented software, by anybody, to constitute a platform

of service, Human Development Network, or in any of the companies of the Governance Group.

12. WILL THERE BE ANY BENEFITS FOR THE FOUNDERS OF THE PROJECT?

Of the total 35 million **IDM** tokens that will be created on March 16th, 2018, a total of 18% or 6.3 million **IDM** tokens, are attributed to the founders of the project at Governance Labs as a reward for their work. The founders of the project will receive the **IDM** tokens, but will not be able to sell them immediately as a third of the **IDM** sent to the founders will be vested for one year, a third for two years, and a third for three years as a demonstration of founders confidence in the project.

13. HOW WOULD LOCAL GOVERNMENTS BENEFIT FROM THE IDMONY PROJECT AND SHARE DONATION?

To begin these local governments will receive a free software and governance model which would have benefitted from three years of dedicated development, earnest growth, strong marketing and continued improvements.

Further, there is a clear and defined socioeconomic component to the project. 7 million **IDM** tokens (20% of the total tokens) are a dedicated donation toward poverty reduction, this will directly impact the communities involved giving a significant boost to the local economy. By embracing crypto technology and working to promote its use and educate their communities, local municipalities will enable the poor to create wealth for themselves and elevate persons from a place of poverty to a position of empowerment and education.

Local governments would also benefit from receiving the Poverty Relief Tool software to coordinate inter-organizational poverty alleviation programs, achieving maximum efficiency in the distribution of the aid they provide.

The Money Making Wallet software they receive would provide services and increased confidence to individual users and business entities alike, not to mention generates money

for the user and the service platform.

Using NFC technology within the Money Making Wallet will also help local governments to stimulate trade, by allowing businesses to receive payments in cryptocurrencies. The NFC technology would allow wireless payment processing by simply bringing the mobile, with the Money Making Wallet active, to the point of sale system.

Local governments will show themselves as visionary and progressive in all the ways mentioned above, but also in supporting the Fundamental Human Right to a Self-Sovereign Identity (virtual personality) which many world organizations would consider essential.

14. BASED ON WHAT CRITERIA WILL LOCAL GOVERNMENTS BE CHOSEN?

It would be required that there be established legislation for the use of crypto tokens. We would also target countries whose local governments have established poverty relief programs. A high technological infrastructure to operate the platform is also important as well as a population that has access to smartphone devices, as users need to run the application. We will also be targeting those with an ability to integrate services, local institutions, and so on with the platform. We want to offer this software to a local government dedicated to incorporating government institutions, businesses, and citizens to this new way of interacting with each other. Ultimately, **IDMoney** wants to engage highly organized local governments who carry great projection both nationally and internationally, to better market and communicate their progress and success of implementation.

15. HOW WILL THE SEARCH FOR LOCAL GOVERNMENTS BE CARRIED OUT?

Shortly after the **IDM** tokens sale begins, an 'Ambassadors Program' will be launched. The objective of this program is to look for and select the local governments which meet the criteria, want to participate in the project, receive the donation of **IDMoney S.A.** shares, and intend to implement the developed software.

The ambassadors are volunteers tasked with contacting local governments from different countries of the world, to whom they will present the **IDMoney** Project, with the collaboration and support of **IDMoney S.A.** The ambassadors who finalize the contract with an eligible local government will receive a significant reward of 100,000 **IDM** and 400 Ethereum (ETH) tokens for each local government selected.

16. WHAT IS THE RELATIONSHIP BETWEEN IDMONEY AND GLOBALMONEY?

IDMoney is the precursor for the GlobalMoney Project. GlobalMoney will expand on the efficient governance model established by the three local governments which will run **IDMoney** as well as offer software that has been fine-tuned, improved upon and perfected to a wider global government community wanting to enjoy the same benefits which would have been evidenced in the **IDMoney** model. **IDMoney** will become the property of the three local municipalities and no longer be part of the Crypto Liberty Consortium. However, should they choose, local governments may continue to count on the collaboration and support of the Crypto Liberty Consortium.

FAQs on the sale of **IDM** tokens.

17. WHAT IS THE NAME OF IDMONEY PROJECT'S TOKEN AND WHAT ARE ITS ACRONYMS?

The token name is **IDMoney** and its acronym is **IDM**.

18. WILL THERE BE A PRESALE? WHEN WILL IT BEGIN AND END?

Yes, there will be a presale of **IDM** token. The presale will begin on June 1st, 2018 at 11:00 AM (GMT -6, Costa Rica's local time). The presale will end when the proffered one million **IDM** tokens have been sold.

19. WHAT IS THE IDM TOKEN PRICE DURING THE PRESALE? WILL THERE BE A PRESALE DISCOUNT?

The price per **IDM** token will be the equivalent of USD 0.75, but it must be paid with Ethereum (ETH) ONLY. During the pre-sale, bonuses will be given as follows:

We will sell 1 million tokens in consecutive batches of 100 thousand units.

BATCH 1 - 90% BONUS

BATCH 2 - 80% BONUS

BATCH 3 - 70% BONUS

BATCH 4 - 60% BONUS

BATCH 5 - 50% BONUS

BATCH 6 - 40% BONUS

BATCH 7 - 30% BONUS

BATCH 8 - 20% BONUS

BATCH 9 - 10% BONUS

BATCH 10 - 10% BONUS

20. WHEN WILL THE OFFICIAL ICO SALE BEGIN?

The ICO sale will begin the instant the presale ends. Therefore there is no specific date and time.

21. WHAT WILL BE THE ICO PRICE AND WILL THERE BE OFFERED DISCOUNTS OR BONUSES DURING THE SALE?

The price of each **IDM** token during the sale will be the equivalent to \$0.75 per **IDM**. The price is fixed for the entire presale and sale periods. There are no discounts or bonuses planned for the sale.

22. HOW MANY IDM TOKENS WILL BE FOR SALE?

Of the 35 million **IDM** tokens created, 6.3 million **IDM** (18%) will be sent to Governance Labs, as compensation for the founders and collaborators of the project, and 7 million **IDM** (20%) will be donated for the **IDMoney** Poverty Relief Program. Therefore, a maximum of 21.7 million **IDM** will be sold. Of the 21.7 million tokens that will go on sale, one million will be sold during the pre-sale.

23. WHEN WILL THE SALE END?

The sale does not end at a specific time; it will end when all **IDM** tokens are sold at **IDMoney S.A.**

24. WHAT CURRENCIES AND/OR TOKENS WILL BE ACCEPTED DURING THE PRESALE AND SALE OF IDMONEY TOKENS?

Only Ethereum (ETH) will be accepted for buying **IDM** tokens in our platform. The price per **IDM** is the equivalent to US \$0.75, but must be paid using ETH tokens.

25. WILL THERE BE RESTRICTIONS ON IDM PRESALE AND SALE?

Yes, there will be the following restrictions:

Based on legislative restrictions prohibiting the sale of tokens and difficulties in obtaining authorization to sell tokens, **IDMoney** will not sell tokens to a person/company of any nationality that is buying from the USA or China, as **IDMoney** does not have the authorization. Additionally, **IDMoney** cannot sell to a company or person who is a national of a restricted country, even if the person is buying from a country without restrictions.

Currently the list of countries where there are restrictions for selling **IDM** tokens are: United States of America and China. More countries may enter the list if restrictions are applied. Countries may also be excluded from the list if restrictions are dropped or when **IDMoney** gets authorization to sell tokens there.

Another applied restriction is that **IDMoney** will not sell tokens to persons or companies linked to money laundering or terrorism.

To implement the restrictions a white listing process has been established, includes the “Know Your Client” (KYC) and “Anti-Money Laundering” (AML) forms. The process begins when the interested party enters the **IDMoney** platform to buy tokens. There, the buyer must complete a registration form, and send the funds to purchase tokens (the minimum is 1 ETH). At this point, **IDMoney** initiates the white listing process. Those who do not pass the evaluation will not be refunded the cost of the white list process (1 ETH). But for those who pass the evaluation, the cost of the process will be recognized as part of the payment for the purchase of IDM tokens. Those that are approved, will receive the equivalent of 1 ETH in **IDMoney** tokens.

To buy **IDM** tokens buyers must be of legal age.

The minimum quantity of **IDM** tokens to sell in a transaction, is the equivalent to one ETH. The maximum quantity to be sold to a single person is one million **IDM** tokens. Nobody can buy more than one million IDM, either in a single purchase or several.

All these restrictions apply for the presale and sale.

26. WHERE AND HOW CAN IDM TOKENS BE PURCHASED DURING THE PRESALE AND SALE PERIODS?

The **IDMoney** site is **IDMoney.io** There you can find a plethora of useful information about the project, the presale and sale, news and even educational videos produced by CryptoLand.tv. As soon as the presale begins, you will find a link on the site allowing you to participate.

From the **IDMoney** site, those interested buying tokens will select the purchase link and be directed to a registration form they must complete for the White Listing process. **IDMoney** will then forward the address to which Ethereum (ETH) payment must be sent. The White Listing process will begin when payment is received. When the White Listing process is successful, **IDM** tokens will be sent to the address specified by the buyer (entered during the

registration process). If the White Listing process is not passed, the ETH paid by the person will be returned to the buyer.

When making payment in Ethereum (ETH) to purchase **IDM** tokens, buyers should do so directly from a crypto wallet. Payments coming from, or made through exchange houses will NOT be accepted. If a buyer sends payments from an exchange house, that amount will be lost, and no **IDM** tokens will be received.

Payments must be sent using a crypto tokens wallet that is compatible with the **IDM** token. **IDM** tokens are ERC-20 compatible tokens distributed on the Ethereum blockchain under a related ERC-20 smart contract. To participate in the **IDMoney** presale and sale, the buyer will need an Ethereum compatible wallet or an application to which only the buyer holds the private keys. Private keys are required to correctly interact with smart contract functions, like transferring cryptographic tokens.

IDMoney S.A. will conduct the official sell only at **IDMoney** website whose address is **IDMoney.io**. If the address does not pertain to the domain **IDMoney.io** it is not the **IDMoney** site (impostors could create similar names). Further, all **IDMoney** email messages will come from the **IDMoney** domain, so that all address will have the form xxx@**IDMoney.io**. Email addresses that do not end with @**IDMoney.io**, it is NOT from **IDMoney!!**

27. DURING THE PRE-SALE AND SALE OF IDM TOKENS, WILL ALL PAYMENTS MADE THROUGH CRYPTO EXCHANGE HOUSES BE REJECTED?

IDM tokens sold during the pre-sale and sale phase will be sold directly to people and companies, NOT through crypto token exchange houses. **IDMoney S.A.** will reject any payment to buy **IDM** tokens from crypto token exchange houses or similar entities. If payments to purchase **IDMoney S.A. IDM** tokens are send through an exchange house or similar company, you will lose what you pay.

IDMoney S.A. will ONLY accept payments made by buyers using their crypto tokens wallet. Additionally, the wallet must be compatible with ERC-20 tokens. Before buying do your

research, understand the restrictions and obtain a suitable crypto tokens wallet. The more secure, the better.

28. WHAT ETHEREUM (ETH) COMPATIBLE WALLETS ARE RECOMMENDED WHEN BUYING IDM TOKENS?

IDMoney S.A. recommends the use of the following:

MetaMask (Chrome browser addon); or MyEtherWallet (no download needed).

The following wallets are known to be **INCOMPATIBLE** wallets. This list is not complete. Do **NOT** use any of the following wallets to participate in **IDMoney** presale OR sale:

Any Bitcoin exchange

Any Ethereum exchange

Jaxx

Exodus

Coinbase

Poloniex

Kraken

Bitstamp

Bitfinex

Bittrex

Cex.io

29. ARE IDM TOKENS TRANSFERABLE?

The Crypto Liberty Consortium, of which **IDMoney** SA is part, will not be involved in any way in the transferability of the **IDM** tokens. However, it is possible that **IDM** tokens can be transferred on a peer-to-peer basis or in a platform operated by third parties during the sale of **IDM** tokens and / or later.

30. ARE THERE NETWORK FEES WHEN TRANSFERRING IDM TOKENS?

Yes, **IDM** tokens are ERC-20 compatible tokens. Therefore transfers will be subject to Ethereum (ETH) gas fees as with all other transactions on the Ethereum network.

31. WHAT HAPPENS IF I DON'T RECEIVE THE IDM TOKENS THAT I BUY?

The **IDM** token presale and sale smart contract and the **IDM** tokens are provided on an “as is” and “as available” basis without representations, warranties, promises or guarantees of any kind made by **IDMoney S.A.** or the Crypto Liberty Consortium. Prior to the purchase of **IDM** tokens, you should ensure that you carry out your own examination and investigation of the risks associated with purchasing **IDM** tokens as set forth in the Purchase Agreement. **IDMoney S.A.** will refund the ETH paid for buying the **IDM** tokens, only when the buyer does not pass the White Listing process and **IDMoney S.A.** has not sent the **IDM** tokens to the buyer. Otherwise, the purchase of **IDM** tokens are non-refundable, and purchases cannot be canceled. Under no circumstances will you be entitled to receive money or any other kind of compensation for **IDM** tokens purchased or for your inability to purchase **IDM** tokens.

32. ARE YOU GOING TO USE SOCIAL NETWORKS, SITES, AND CHATS TO SHARE INFORMATION, ANSWER QUESTIONS AND RECEIVE COMMENTS?

Yes. Here is a list:

BitcoinTalk: **IDMoney**

The administrators and collaborators of the **IDMoney** community will try to respond as quickly as possible. It will not always be possible. However, we ask for your patience as we work to execute our vision. Priority will be given to registered buyers. Sometimes it will be necessary to provide general answers in response to questions, but **IDMoney S.A.** will do their endeavor best to answer as clearly as possible. At **IDMoney.io** you can find the latest news about the project and useful information. In addition, this document could be updated to include new frequently asked questions.
